The room features a wall with a complex, geometric pattern of interlocking diamonds in shades of blue and black. Above this wall is a large, curved wall with a honeycomb or bubble-like texture. The ceiling has a recessed light fixture. A small, dark, rectangular ottoman sits on the wooden floor next to the hot tub. The overall lighting is warm and ambient.

OUR PRODUCTS

Rituals

MUDBATH RITUAL

25-minute cycle

Ideal for several types of baths, like packs with mud and clay. The rising temperature inside this environment allows the packs to dry on certain parts of the body, thus releasing the active ingredients, and to eliminate impurities. The following steam inlet softens the mud, or the applied pack, and makes the rinsing easy. Lastly, a warm rain scented with passion fruit fragrance removes the cosmetic product and leaves the skin soft, clean and perfumed.

ESSENCE RITUAL

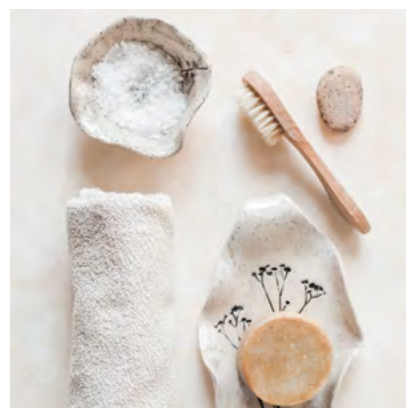

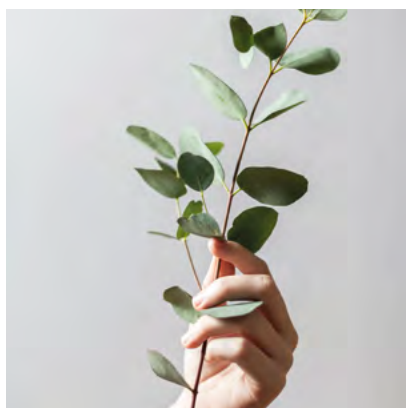

23-minute cycle

Characterised by warm steam and essence of Eucalyptus. Once the temperature is mild, a short steam bath and a light cold breeze are alternated. This alternation supports the upper respiratory tract. It can be combined with a cosmetic product, like body scrub or a washing lotion, which favours skin cleansing and drainage of excess liquids.

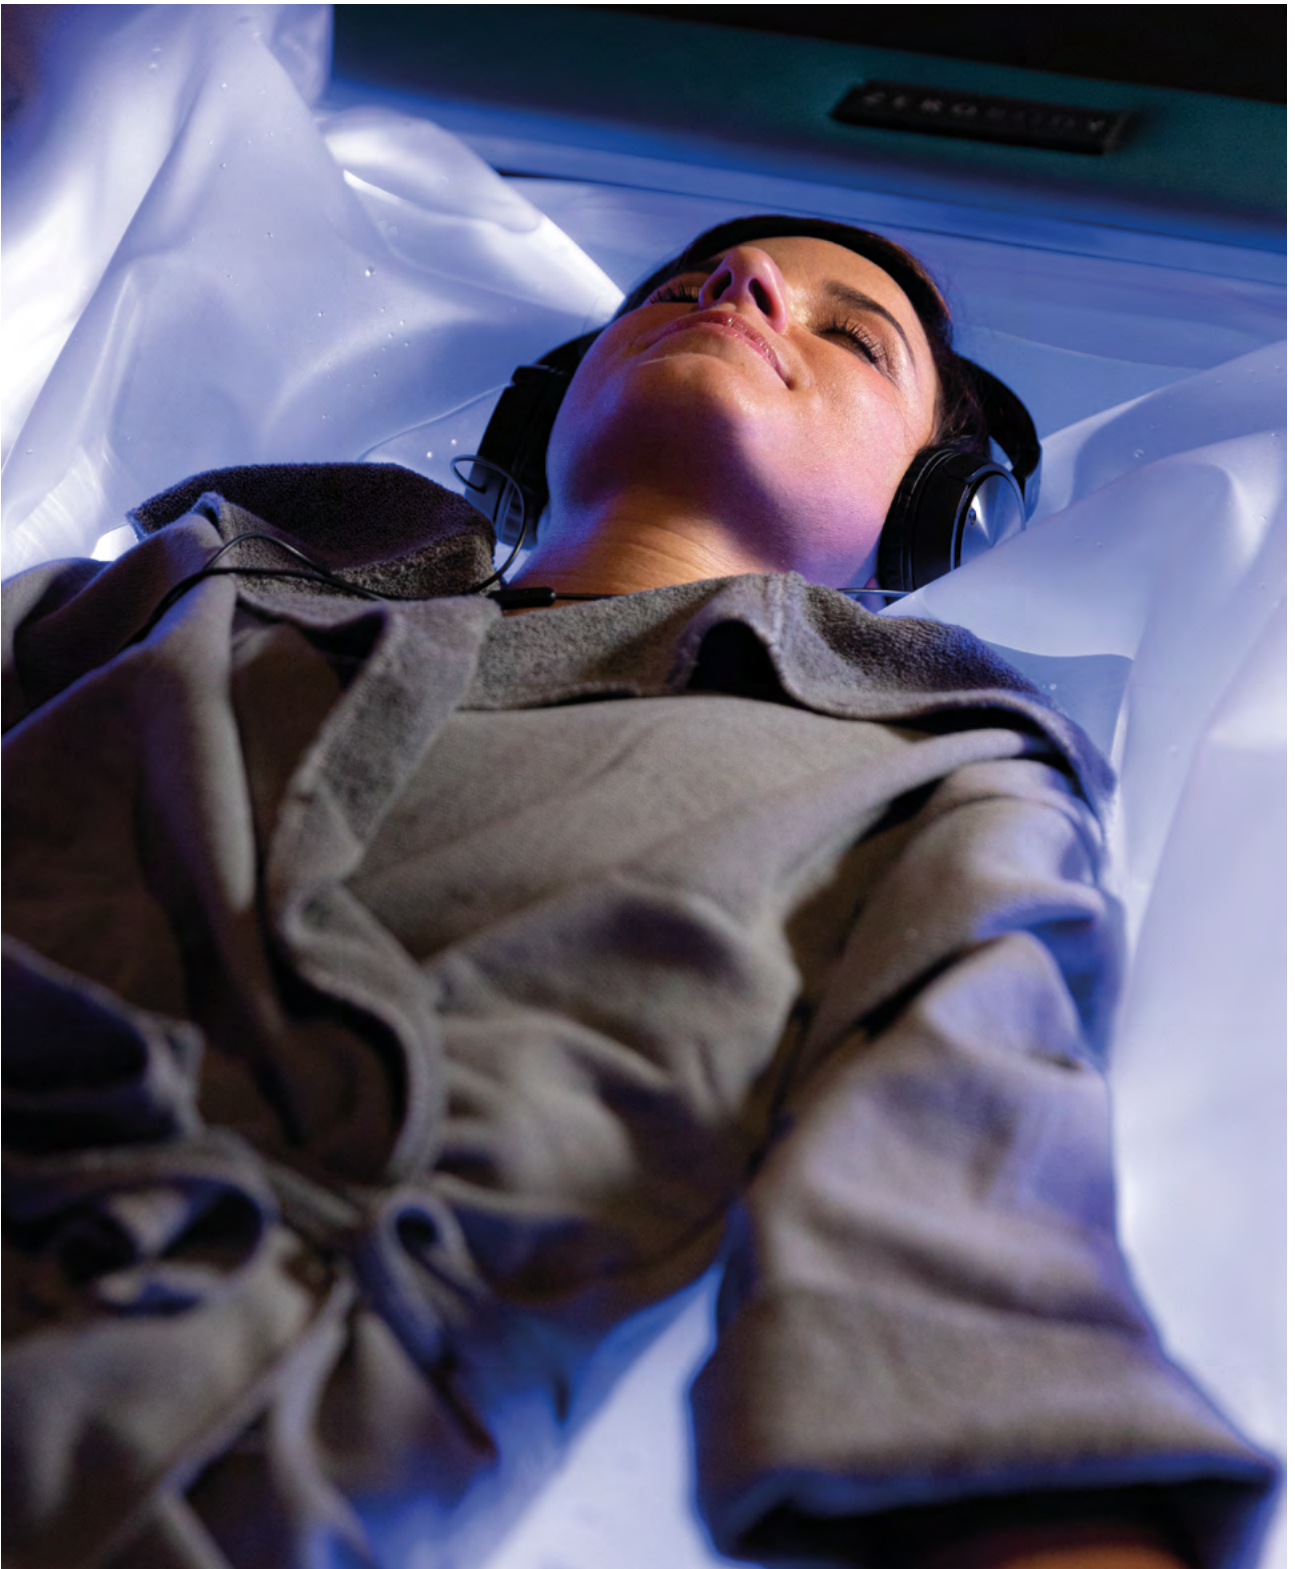

RITUAL OF TIDES

29-minute thalasso-cycle

This ritual consists of a brief phase of mild eat and exposure to steam, followed by the inlet of a saline solution mixed with Eucalyptus essence. The alternation of saline solution and steam is repeated for three times, so creating a synergy between the breathing and the drainage of excess liquids favoured by the salt. This program was designed specifically for detox and drainage of excess liquids. Once the cycle is over, it is very important to recover the lost fluids, drinking water, extract juice, tea or an infusion of your choice.

Through its intuitive software, it is possible to customise the Dry Float Therapy session with audio-guide **Brain Training** programs: Mindfulness and breathing exercises that favour complete psycho-physical balance.

Zerobody requires very **little maintenance** and only needs an electrical connection.

[Discover more on Zerobody Cryo](#)

Zerobody Cryo

Zerobody Cryo is the Starpool revolution in the world of Cold Therapy. Innovative in its simplicity, safety and accessibility, it features a patented **water membrane** that wraps the body entirely without the need to get wet. Zerobody Cryo cools off the skin, **stimulating the immune and metabolic system**. It causes a general state of well-being and specific physical and mental benefits: skin rejuvenation, reduction of muscle and joint pain, promotion of fast and effective muscle recovery, and endorphin production, thus lowering the level of stress.

Perfect for a wellness offer in tune with the times.

[Discover more on the Molecular Hydrogen Booster](#)

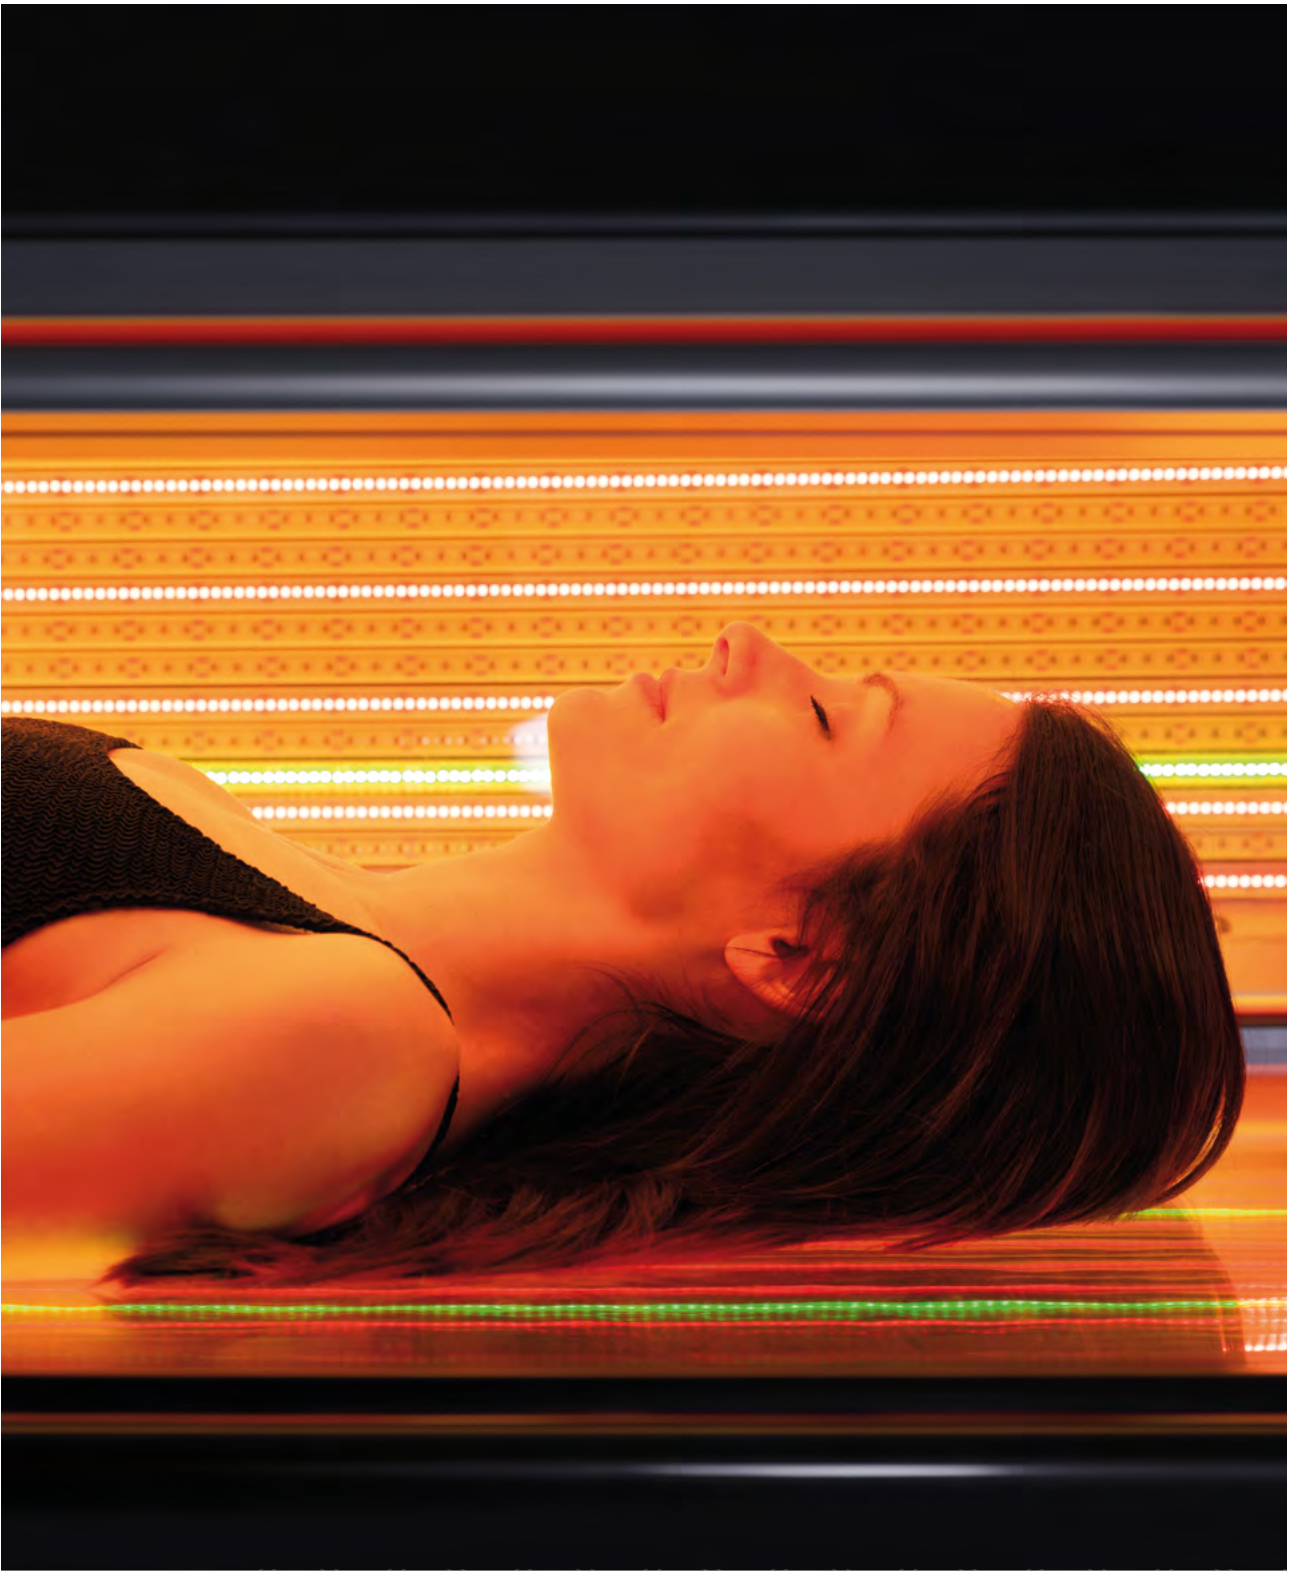

Molecular Hydrogen Booster

An easy-to-use, cutting-edge technique that, thanks to a practical **portable intranasal system**, offers a large variety of psycho-physical benefits: it counteracts the harmful effect of free radicals, delays cell ageing, and slows down skin slackening and wrinkles formation.

As a matter of fact, molecular hydrogen is a **powerful antioxidant** that acts on memory and focus: it favours cognitive enhancement, reduces the sensation of fatigue, relieves anxiety and improves the ability to fight stress.

In addition, it has an anti-inflammatory effect that improves, for instance, first and second degree cellulite.

[Discover more on Photobiomodulation Therapy](#)

Photobiomodulation

A therapeutic technique based on **low-frequency light energy emissions**, which penetrates the cells through the skin, giving them new energy and making them function more effectively.

Light that gives balance to the whole body,
reducing inflammation and oxidative stress.

Photobiomodulation can have a beneficial effect on brain cells,
favouring focus and mental sharpness.

It is also a valuable support for the **health and beauty**
of your skin: it favours the production of cell energy,
improving the intake of nutrition and oxygen,
and it boosts collagen production. Your skin will then appear
brighter, more hydrated and smoother.
